

## We've Merged!

Behavioral Lab and Xlab have merged their SONA accounts to berkeley.sona-systems.com

#### Researchers

- Have access to a larger participant pool
  Participants
  - Only sing up once on SONA, our shared participant management system
  - Can choose between a variety of B-Lab and Xlab studies

#### **Payment Plans**

Berkeley Prepaid Virtual Visa is replacing Citibank Virtual Visa as the Xlab's electronic payment option.

The program creates a virtual Visa debit card account, into which Xlab can pay subjects. The money can be spent anywhere on-line that accepts Visa.

There is a per transaction charge for using the Berkeley Prepaid. For now it will be subsidized by Xlab.

## **More Grant Money**

Xlab is lifting the \$1,000 limit to Xlab research grants.

These grants can now be used to pay participants outside of the Xlab subject pool.

**Issue 25** September 10, 2015

## **Hello and Goodbye**

Miho Tanaka's last day at Xlab was earlier this summer. Her contribution to Xlab is greatly appreciated and her impact on Xlab will be remembered.

Jaya Roy recently joined the team as Behavioral Lab Coordinator and Xlab student staff supervisor. When she isn't working with B-Lab or Xlab, she's teaching Cognitive Science at the California College of the Arts or helping with Clinical Psychology research at CAL CALM lab.

# **Moving Soon**

This December we are re-locating to the Hearst Gym.

Our new space is large and can also accommodate small group studies! When the Haas library is remodeled, we expect Xlab to move back into the S building at Haas. This space will be shared with Behavioral Lab, giving you flexibility and more Haas resources at your disposal.

#### Like Xlab?

We would love to hear from you. Send us your feedback <u>HERE</u>.
