

Safety protocols for in-person experiments

Check-in before your study session

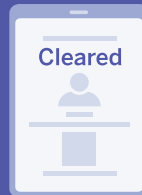

Arrive **5-10 minutes before your session's start time** to be screened for COVID-19 infection. If deemed ineligible, no compensation is available.

Wait in the designated area **outside of room S260 in the Business School Library**. Detailed directions are available at xlab.berkeley.edu.

All participants must be screened for COVID-19 in one of the following ways:

❶ Present a certificate from Berkeley's **online symptom screener** available on your CalCentral dashboard.

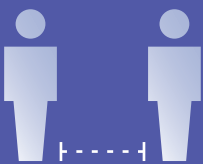

❷ Present your **green badge on eTang** as an indicator of negative COVID-19 status. Learn more at uhs.berkeley.edu.

❸ **Answer a series of screening questions** about COVID-19 exposure. Non-members of the UC Berkeley community may also be asked about their vaccination status.

During your study session

Participants and researchers will be reminded to always **keep a distance of 6 feet**.

Upon entering the lab and leaving the lab, **participants are recommended to sanitize their hands**.

Each session in room S260 can accommodate a **maximum of 14 participants**.

Everyone who enters the lab is **required to wear a mask**. Xlab will provide masks if needed.
